

Why Remote Access

Ensure seamless machinery management remotely

Optimize service, streamline maintenance and increase machinery performance.

Ensure post-sale control with secure Remote Access through VPN for your machines.

X Platform offers a high-speed remote connection to your HMI, Gateway, and machinery components. The multi-server architecture ensures an automatic link to the nearest server, delivering unparalleled optimization for remote edge management and service.

Effortlessly interact with a user-friendly Web-Based interface, crafted for seamless device and endpoint configuration.. Unleash your customization potential as you create applications and profiles tailored to each machine component, empowering you with unprecedented control.

Tailor access through assigned user roles, granting specific permissions to various functions and components. Experience the Direct Access functionality, a game-changer that provides swift and efficient entry into applications and endpoints through a user-friendly interface. Connect rapidly, whether on a mobile device, tablet, or PC, and elevate your machinery control experience with confidence through X Platform.

Main Benefit:

- Profinet Scan
- Only outgoing connectivity
- Direct access to device and defined endpoints
- Installation and maintenance cost reduction
- Easy management of tenants access with dedicated company domains
- User and profile management to differentiate user access to the domain and
- Different views according to different tenant
- Multiple applications (Web, VNC, JMobile client...) on device and endpoints via Web browser
- Web agent to connect machine and endpoints using related configuration software to debug and update

The X Platform world

In the dynamic world of industrial automation, the X Platform exists to bridge the gap between the aspirations of machine builders and the real-world needs of factory owners. The platform serves as a comprehensive toolbox, helping you address current challenges while preparing for future ones.

The X Platform is more than just technology; it's a partnership. It empowers you to tailor solutions to your unique challenges, ensuring that you remain at the forefront of industrial innovation. The goal is to give machine builders the freedom to focus on what they do best: creating outstanding machines that meet the needs of factory owners like you.

What is a Today's Need...

1. Edge Security - Protecting your data and your business.
2. Remote Access & VPN - Simplifying system integration, providing you with the ability to monitor and adjust processes anywhere.
3. Fleet Management - Making updates remotely: time and resource saving.

... a Tomorrow's Want ...

1. Remote & Condition Monitoring - Giving you the tools for proactive diagnostics.
2. OEE & Energy Efficiency - Monitoring and managing resources for sustainable growth.
3. Performance Consultancy - Offering insights into optimizing your machinery's potential.

... and a Future Vision?

1. Marketplace Integration - Creating potential channels for resource and information exchange.
2. Virtual Logic Control - Preparing for the possibilities of AI-driven process enhancements.
